Heavy Service Ever-Lok® – Overview

Heavy Duty Automatic Locking Receptacles, Plugs & Connectors

30-100 Amp, 480VAC / 250VDC

Heavy Service EverLok components **stay** plugged-in so your portable equipment stays on. The industrial **standard** for portable welders and other industrial equipment locks in place automatically at insertion – no screw collars to bother with. With its contoured handle, an easy counter-clockwise twist releases the plug for withdrawal, even under full-rated load / circuit-interrupting conditions.

Simple and rugged, the Heavy Service EverLok self-locking system sets the standard for easy access in facilities, welding and industrial equipment use. All standard receptacle configurations are available, as well as reversed contacts – service options.
